## PROJECTS

### 01 Pentest

End-to-end AWS Cloud deployment — environment configuration, frontend and backend service deployment, AI agent integration, and CI/CD pipeline setup for automated build and release workflows.

### 02 Telesecai

Full environment setup on Google Cloud Platform (GCP) covering frontend, backend, PostgreSQL database, recon agent deployment, and CI/CD pipeline implementation for continuous integration and delivery.

### 03 CIMFR

Service-based PHP version migration project. The legacy site ran on PHP 5.6; the task was to upgrade to the latest PHP version by refactoring deprecated code, updating syntax and formats, and validating full post-migration functionality.

### 04 Brightdirectories.com

Manual testing of demo and automation themes with BrightDirectory plugins. Built an editor for plugin documentation in superadmin. Delivered plugins: Website Chat via Facebook, AdBlock Recognition Tool, Anti-Spam Form Protection, RSS Feed Content, V Card, and Google Sitemap Builder.

### 05 Car Rental / JetSki

Full-stack feature development for a vehicle and water-sports rental platform. Delivered JetSki listing pages, JetSki detail views, and complete frontend and backend implementation for the JetSki module.

### 06 GHL AI Snapshots

Marketplace where users search, browse, and purchase funnel templates and websites. Delivered 30 funnel templates and 15 websites spanning multiple business categories.

## 07 Pannipariba.com / Franchise

Franchise module for an e-commerce platform — user registration with full profile data, product management (add / edit / delete / update), payout tracking, order management with filters, and OTP-based forgot-password / change-password flows.
